GROUP 2 results

Collected needs

- Local ticketing systems to feed eTokai

- User forum for eTokai and ASMT with shared repository of templates

- eTokai-ASMT connection to determine level of reporting

Network Manager
nominated by
the European Commission

Collected needs

- More default statistics in ASMT for SMI: events to be grouped by different characteristics + connection with eTokai to highlight contributing factors to each "family"

- Voice recording attached in eTokai reports to be synced with ASMT when re-playing the event

- If ASMT events correspond to existing one in eTokai, then highlight and feed eTokai

Network Manager
nominated by
the European Commission

Collected needs

- **All comments on one document only in eTokai**

- **ASMT: collection of runway events**

- **Extend weighting options**

Network Manager
nominated by
the European Commission

Collected needs

- Allow for data quality checks in free text fields – ensure somehow adoption of a common, correct terminology

- Automatic input to eTokai of system data like MET data

- Possibility to add new data fields

Network Manager
nominated by
the European Commission

Collected needs

- Record number of significant delays

- Record number of a/c going to alternate airports

Collected needs

- APF: Include statistical process control triggers, e.g. number of sequential increasing points

- Refine the what-if analysis

- Default weights used by other ANSPs to drive discussion

Network Manager
nominated by
the European Commission

Collected needs

- ASMT to open new "reports" into eTokai automatically but to kept in a different "area" of the tool – separated by those reported by humans
