Workshop Agenda

Management and oversight of Change to the F.S. (EU 2017/373)

DAY/ TIME	09:00					12:30		13:30			16:30
17/01		00 Welcome & Introduction	01 Safety Criteria Monitoring Criteria	Coffee Break	01 Cont'd	02 Multi-Actor Changes		02 Cont'd		Coffee Break	03 (Absence of) Transition Period
18/01	00 Welcome Back		04 Notification of planned changes to the F.S.	Coffee Break	05 Impact on the Organisations	06 Future launch of NPA on SRM		07 Status on NPA-2017-10 on SW	08 Conclusions		

Notes on multi-actor changes

- Would it make sense that we (ANSPs/SPs) share some templates
  - 373 not helping in harmonization of practices throughout Europe….
  - E.g.: for setting up specifications of a Surv. Service provided to a neighbouring ANSP.

Elements to bring back home

- I'm not alone, we have a community

- Eye opening workshop, even if still foggy

- We have homework

- Liked the structure of the WKS

- If not yet done, urgent to start the coordination with the C.A.

- Highlight on the need for some level of risk modelling
  - More or less developed/formalized
  - Self developed or re-use of already developed

Elements to bring back home

- Clarification on S.A. and S.S.A. and when to "do" them

- S.A./S.S.A. proportionate to the change

- Collect the data to support expert's judgment

- Keep the "good things" we are currently doing
  No need to do "very different than today"
  Some freedom but we have to "fit in" the AMCs

- Link between SMS functions

- Clarification on the use of "proxy"
  Reuse SOCS and call it "Proxies CS"

Elements to bring back home

- Update/Improvements in the notification process
Use of different notification processes and "exclusion criteria"

- Use of long breaks for networking and discussing

Elements not to forget in further discussions

- Need further clarifications about the (absence of) transition period

- How to deal with (1) suppliers and (2) contracted activities

- Need more on how to understand and work with safety criteria
Use of the "relative approach"
More examples to share on safety criteria and proxies

- Need to create a document or a framework collecting the developed/proposed practicalities (?)

- Sharing of templates

  - E.g.: for setting up specifications of a Surv. Service provided to a neighbouring ANSP.
