Scope and objective

The objective of this factsheet is to share with the aviation community the latest aviation relevant information on the outbreak and its impact on aviation operations. As the situation evolves, the document will be updated, when required.

During periods of increased activity, the factsheet will be complemented with a daily update brief that summarises the developments during the previous 24 hours.

Generic information

EACCC Rules of Procedure

The EACCC Rules of Procedure can be found on EUROCONTROL OneSky Teams:

<https://ost.eurocontrol.int/sites/NMCR1/Rules%20Of%20Procedures/Forms/AllItems.aspx>

EACCC contact information

The up to date EACCC contact information can be found at EUROCONTROL OneSky Teams:

<https://ost.eurocontrol.int/sites/NMCR1/Lists/EACCC%20contacts/AllItems.aspx>

NM contact information

The contact information of the NM crisis management team can be found at EUROCONTROL OneSky Teams:

<https://ost.eurocontrol.int/sites/NMCR1/Lists/NM%20Crisis%20management%20team/AllItems.aspx>

National Crisis Management Structures

Information about the national crisis management structures in the EUROCONTROL member states can be found on OneSky Teams:

<https://ost.eurocontrol.int/sites/NMCR1/SFP%20corner/Forms/AllItems.aspx>

Scenario specific information

Information sources

WHO

Information from WHO on recent outbreak events:

Contacts

TBD

State Focal Point checklist

Pre-event actions

Check if latest version of WHO International Health Regulation (IHR) is available ☐

Keep contacts details of national health authority representatives up to date ☐

Regularly check EACCC telephone and mail directories ☐

Monitor media, WHO and weekly ECDC reports ☐

Actions during event

Evaluate the likelihood that own region is affected ☐

Contact the EACCC eaccc@eurocontrol.int ☐

Take steps required by national and international regulations ☐

Prepare the participation in EACCC teleconferences ☐

Support EACCC as requested ☐

Acronyms

ACI	Airport Council International
CAPSCA	Collaborative Arrangement for the Prevention and Management of Public Health Events in Civil Aviation
DG SANTE	European Commission Directorate for Health and Food Safety
COVID-19	The official WHO acronym for the disease caused by the novel Corona virus SARS-CoV-2
EACCC	European Aviation Crisis Coordination Cell
ECDC	European Centre for Disease Prevention and Control
IATA	International Air Transport Association
ICAO	International Civil Aviation Organisation
NM	Network Manager
SARS-CoV-2	Official WHO acronym for the novel Corona virus strain

Event specific information

Description of event

On 31 December 2019 a cluster of pneumonia cases was reported in Wuhan, Hubei province of China. Since then, the number of cases has been steadily growing.

It seems that the situation in China is relaxing a bit, but the number of cases outside China is increasing significantly, also in Europe.

A novel corona virus (SARS-CoV-2) was discovered as causative agent.

WHO officially declared the COVID-19 outbreak as pandemic on March 11th.

Characteristics of the disease

Specifics of the disease:

Specific pathogen name:	Novel Corona Virus (SARS-CoV-2)
Transmission type:	Animal-human and human-human
Reproduction Rate R0 (ECDC):	2.2 (mean value)
Case fatality rate (WHO):	3.4%
Incubation time (ECDC)	5.2 days (mean value)

Geographical information

The outbreak started in Wuhan, China and a limited but growing number of cases have been seen in multiple countries. The WHO and ECDC documents contain the latest details about the spreading of the disease.

EASA

The European Union Aviation Safety Agency published on 2 April 2020 an updated Safety Information Bulletin providing operational recommendations related to the SARS-CoV-2 outbreak. This aligns it with: 1) the Safety Directives aiming to reduce the risk of spread of the novel coronavirus through flights to and from high risk areas; and 2) the Guidelines recently issued by EASA to ensure that appropriate preventive measures are taken by the aviation industry to prevent the spread of SARS-CoV-2 virus in aviation environment. This revision of the SIB includes recommendations for the use of face masks for crew members, measures regarding social distancing in the airports as well as a recommendation for the crew members not to use personal disinfectants to disinfect aircraft surfaces. Further editorial changes and clarifications were made to provide a better understanding of the operational recommendations, particularly with regard to the instructions of public health authorities. See here the full text of the SIB: Safety Information Bulletin 2020-02

In order to enable an early availability of a transport solution in the frame of the current COVID-19 pandemic, EASA has committed to treating projects supporting the collective effort to transport medical supplies and other important goods as efficiently as possible. We have published on 2 April 2020 guidance on the design change classifications, certification aspects as well as use of Exemptions in accordance with Art. 71.1 of the Basic Regulation 2018/1139 for limited time periods.

EASA has created a dedicated webpage on EASA-related COVID measures: <https://www.easa.europa.eu/the-agency/coronavirus-covid-19>

State focal points

We have received the following feedback from the State Focal Points on the respective national actions.

State	Actions taken	Actions planned
Armenia 06-03-2020	--	--
Austria 14-03-2020	• Emergency Response Plans at aerodromes regarding communicable diseases since 2014 • establishment of COVID-19-Core-Team, consisting of Public Health Authority, aerodrome operators receiving direct flights from PRC, IT-North, IR and KR (LOWW), airline operators operating direct flights from PRC, IT-North, IR and KR (Air China, Austrian Airlines, China Southern Airlines, Hainan Airlines, Korean Air, Iran Air, Laudamotion and WizzAir) • regular briefing of Austrian government (de facto platinum-level) • suspension of direct flights from PRC (Austrian Airlines, China Southern Airlines and Hainan Airlines) • information posters and leaflets regarding COVID-19 at airports • coordination/facilitation of aerodrome LOWW due to the repatriation of 7 Austrian citizens from FR on 02.02. by Austrian Air Force • coordination/facilitation of aerodrome LOWW due to the repatriation of 6 Austrian citizens from DE on 09.02. by Tyrol Air Ambulance • entry screenings of all direct flights from PRC since 06.02.2020 • entry screening on all direct flights from IR and KR since 03.03.2020	

	• identification and gathering of contact information of passengers having been to PRC, IT-North, IR or KR in the previous 14 days Be informed that according decree 93/2020 flights from France, Spain and Switzerland will be banned in Austria starting with 17.03.2020 00:00 am. Be informed that flights from United Kingdom, Netherlands, Russia and Ukraine will be banned in Austria starting with 18.03.2020 00:00 am. Exemptions are effective for cargo, emergency, ambulance or ferry flights, crews of these flights are furthermore exempted from the need to provide a medical certificate.	
Azerbaijan 22-03-2020	Operational Headquarters under the Cabinet of Ministers monitors overall COVID-19 situation and takes necessary measures and decisions. Visas upon arrival at Azerbaijan International Airports are not available since 13 March 2020 04:00 UTC. Passengers upon arrival: - must fill in the public health passenger locator form - will be tested for COVID-19, -will be placed in quarantine for min 14 days. Only Pax with Azerbaijan citizenship, holders of residence and work permits are allowed to enter Azerbaijan. Pax with other nations may be granted to enter country in case they have special permission from Azerbaijan government. International flights to/from Azerbaijan are restricted (except cargo flights), and subject to clarification with slot coordination center. The detailed information is in the Relevant NOTAMS: A0019/20, A0029/20, A0030/20	

Belgium 13-02-2020	--	--
Bulgaria 11-03-2020	By order of the Prime Minister a national multi-agency coordination group was set up to manage and coordinate the actions of competent state authorities in relation to the response to COVID-19 disease. MH maintains 24 hour hotline (+359 2 807 87 57) for questions concerning the COVID-19 epidemic and site with daily updated information /separate for citizens and instructions for medical specialists /: https://www.mh.government.bg/bg/informaciya-za-grazhdani/informaciya-otnosno-noviya-koronavirus-2019-ncov/ Quarantine has been imposed for hospitals, medical staff and citizens who have had contacts with the infected by COVID-19 people without protective clothing and masks. Bulgarian DG CAA and aviation community are following the instructions of the WHO, ECDC, ICAO, EASA, IATA, ACI and EUROCONTROL and are responsible for forwarding them to the various stakeholders and personnel in the aviation community. The DG CAA regularly sends updated safety information bulletins and prevention recommendations, and controls the implementation of the measures by the whole aviation community in the country. A link to the relevant information from International and European organizations has been published on: https://www.caa.bg/ Targeted working groups at the airports are regularly briefed on the guidance and recommendations in the documents of WHO, ECDC / CDC /, ICAO, CAPSCA, EASA, IATA, MH and DG CAA. Regional health inspectors provide permanent entry screenings of arriving passengers and hold meetings with managers of all stakeholders at the airports.	Depending on further developments.

	The current Contingency Operational Plans for the prevention of the import and local spread of diseases have been updated. Medical examinations and isolation rooms have been prepared near the arriving passenger areas. There is also a procedure in place for dealing with patients showing symptoms of acute respiratory disease. Passenger information measures have been implemented by the airport operator (display of instructions on the monitoring systems of terminals, distribution of flyers to inbound in terminals). All international airports provide passenger locator forms. The frequency of airport and aircraft cleaning and disinfection is increased. Airport personnel had been provided with protective equipment - face masks, gloves and clothing. AIP regarding communicable diseases – GEN 1.3-6 Public Health Requirements.	
Croatia	Here's the link to the CCAA information - http://www.ccaa.hr/english/detalji-novosti_31/information-to-aviation-community-regarding-coronavirus_1083/	
Cyprus 13-02-2020	--.	--
Czech Republic 09-03-2020	--	--

Denmark 23-03-2020	Intensive coordination is ongoing with national authorities, including health authorities, within the national crisis staff. ATS, airports and airlines are following local procedures, based on existing regulation and recommendations from the Authorities including EASA. Some minor airports have chosen to close or reduce opening hours. Presently main actions are imposed to prevent the virus to spread by ensuring people to maintain distance between each other and avoid crowding. At CPH airport this may lead to situations where passengers are not allowed to leave the aircraft until baggage has reached the baggage delivery area. Traveler restrictions apply meaning that non-Danish citizens will not be allowed to enter the country unless they have “worthy” reason. For actions taken by ANSP please refer to separate questionnaire	The situation is continuously evolving and monitored closely. No operational measures planned. Future measures will follow instructions from national authorities based on actual situation.
Estonia 14-02-2020	--	--
Finland 08-04-2020	By this time there have been approximately 2300 confirmed cases of the COVID 19 virus. So far 34 fatalities reported. Large amount of the cases are still in the Uusimaa province (Metropolitan Helsinki region). It has been estimated that the peak of infections has not yet been reached. The lock down of the southern Uusimaa region was discussed during two weeks ago and the government decided to go ahead with it and the lock down has been in force since 00:00 LT 26 March. Travelling of the general public is forbidden to/from the Uusimaa province and is in force for the time being. The reasoning behind the decision is that the region still has the most cases of infection and this action is intended to prevent and control the spread of the virus to other provinces and regions which are so far less affected. The health authorities have placed restrictions on public gatherings limiting the number of attendees to a maximum of 10 persons. All public events such as concerts, sports and	

	festival events have been cancelled due to set restrictions. Most of the hotels and restaurants are closed the latter limited to restaurants that provide take-away food services. The carriers have notified of a significant reduction in operations and capacity, up to 90% of all flights cancelled since the beginning of April. Several domestic airports have now been closed as the demand of capacity has dropped drastically. The Finnish Transport and Communications Agency Traficom (CAA FI) has published a NOTAM effective 02 April till 13 April 2020 suspending a large number of flights arriving from outside the Finnish borders. Overflights are not affected. Cargo flights are operated normally. The NOTAM can be found through the following link under section EN ROUTE: https://www.ais.fi/ais/bulletins/efinen-fr.htm Number of repatriation flights of Finnish citizens are planned and performed at present. Further information can be found at: https://thl.fi/en/web/infectious-diseases/what-s-new/wuhan-coronavirus-latest-updates https://www.finavia.fi/en/newsroom/2020/how-are-finnish-airports-prepared-coronavirus	
France 04-03-2020	----- - French Government : https://www.gouvernement.fr/info-coronavirus - French Ministry of Health : https://solidarites-sante.gouv.fr/soins-et-maladies/maladies/maladies-infectieuses/coronavirus/article/coronavirus-informations-pour-les-voyageurs - French Ministry of Foreign affairs : https://www.diplomatie.gouv.fr/fr/conseils-aux-voyageurs/conseils-par-pays-destination/chine/ ----- Update of the situation in France: 1)	

	1) General situation – to date March, 26rd • Since 24. January 2020 : 25 233 cases confirmed by PCR tests (11 539 currently hospitalized) ; 1331 deaths in hospitals. • The virus actively circulates throughout the French territory, including ultra marine territories. • On March 14. : France has triggered stage 3 of its Pandemic Plan (objective of stage 3 is to prevent and limit virus circulation). • Since March 17, by decision of the President of the Republic, going outside is prohibited except for essential reasons, and provided that people carry a certificate. • Since March 18., France has restored external and internal Schengen boarder controls (namely, entry ban for foreign nationals who lack a residence permit in Schengen area, EU or UK). 2) Situation as regards air transport • About 120 countries have edicted access bans for travelers from France (except for their nationals), suspended their flights, or closed their boarders. • Following the restoration of boarder controls in France, a new NOTAM "passenger restrictions" has been published on March 21. (see attached). • Restoration of border controls as well as containment decision will reduce traffic to near to zero until end of March, with gradual recovery. - o All the airports are still able to accomodate air traffic. - o Some airports are closed to commercial air transport, in particular Caen, Lorient, Limoges, Strasbourg, Metz-Nancy-Lorraine, Aix les Milles, Toulouse Francazal, St Pierre et M. - o Some airports remain open to commercial air transport with reduced capacity (closing of some terminals or reduced	
--	--	--

	schedule) : Paris-Orly, Paris-CDG, Nice, Marseille, Lyon, Bordeaux, Montpellier, Vatry, Perpignan, Brest, as well as the main ultramarine airports. o Some airports remain open as usual : Paris-Le Bourget, Nantes, Toulouse Blagnac, Bâle Mulhouse, Cannes, Lyon Bron, Toulon, the Corsican airports, Miquelon, St Pierre Pierrefonds, Tahiti. • Repatriation of French nationals is managed in coordination with airlines and the French Foreign affairs ministry. • On French airports still accomodating direct or direct or indirect flights from impacted countries, whether or not regular flights, DGAC relays via its local correspondents, the recommendations of the Ministry of Health intended for travelers. Information for travelers by display is implemented at all 85 airports likely to accommodate international flights.	
Georgia 17-02-2020	--	
Germany 02-03-2020	Please refer to the NOTAMs published by German authorities for further information	
Greece 27-03-2020	Greek National Health Organization (EODY) is the responsible entity for determining actions and providing information to the general public as well as other stakeholders, including the airlines and airport operators. Info can be found at : https://eody.gov.gr/wp-content/uploads/2019/01/orismos-krousmatos-2019-nCoV.pdf) Specific advice for travelers (additional to previous information) can be found at : https://eody.gov.gr/novel-coronavirus-covid-19-advice-for-travellers/	Regular reassessment of the situation.

	NOTAMs have been issued and are regularly updated concerning restrictions to flights and passengers. (A0910/20, A0923/20, A0952/20, A0953/20) Health bulletins, specific health instructions and prevention recommendations are updated regularly and can be found at the website of our National Health Organization (EODY) https://eody.gov.gr/anakoinosi-neon-metron-gia-tin-prostasia-tis-dimosias-ygeias/ Regular reassessment of the situation. For actions taken by ANSP please refer to separate questionnaire	
Hungary 13-02-2020	--	
Iceland 21-03-2020	Four instances of transmission inside Iceland were confirmed today. As a result, the National Commissioner of the Icelandic Police has raised the alert level of the response to the COVID-19 virus outbreak and moved the response into the emergency phase. Daily coordination meetings with National Crisis Center, the National Epidemiologist and relevant agencies Information being provided for all staff at Keflavik airport. Information text messages to arriving travellers at Keflavik airport. Information for travelers distributed https://www.landlaeknir.is/um-embattid/frettir/frett/item38864/Information-for-travelers-%E2%80%93-Coronavirus-2019-nCov	Depending on further developments

	Iceland has implemented the travel restrictions imposed for the Schengen Area and the European Union. As of 20 March 2020 and until 17 April 2020, foreign nationals - except EU/EEA, EFTA or UK nationals - are not allowed to enter Iceland. For more information this webpage can be used: https://www.government.is/news/article/2020/03/20/Iceland-implements-Schengen-and-EU-travel-restrictions-/ For actions taken by ANSP please refer to separate questionnaire	
Ireland 21-03-2020	Ireland has advanced plans in place as part of its comprehensive preparedness to deal with public health emergencies such as COVID-19 (Coronavirus). Ireland is currently in a delay phase and initiatives are in place to slow the spread of the virus. Ireland is prepared to initiate a second phase, if necessary, called the mitigation phase. This will be activated where containment is no longer effective in controlling the spread of COVID-19 (Coronavirus). In this phase, our focus will be on identifying the cases who are most severely unwell. The deployment of these strategies is in sync with global strategies, guided by the World Health Organization and the European Centre for Prevention and Disease Control (ECDC). The Department of Foreign Affairs and Trade advises against all non-essential travel overseas, including Great Britain, but does not apply to Northern Ireland. A do not travel advisory is in force for Italy. These decisions were taken on the advice of the National Public Health Emergency Team to combat COVID-19 and in view of the imposition of new restrictions on entry by many countries and the ongoing reduction in international flight services.	Closely monitoring the situation

	The Irish Health Authorities require anyone coming into Ireland, apart from Northern Ireland, to self-isolate on arrival for 14 days. This includes Irish residents. Exemptions are in place for providers of essential supply chain services such as aircrew. Airline Operators have been instructed to announce on board all flights prior to the arrival in Ireland of the passenger (including Irish Residents) requirement to self-isolate on arrival for 14 days and to consult www.hse.ie for further information. If during this period the passenger develops symptoms to contact a doctor to arrange for testing. To date, entry screening at ports and airports is not recommended by WHO or the ECDC. Effective public health protocols in place at ports and airports include: airline crews have been briefed by the HSE in recent weeks in the event of a suspected case, contact tracing forms will be distributed to all passengers and completed forms will be passed to HSE lead personnel at the incident site the airline is instructed to decontaminate the aircraft in accordance with WHO aviation hygiene standards.	
Israel 10-03-2020	Many Israeli and foreign Airlines suspended flights to/ from effected areas due to lack of demand, The population and immigration authority of Israel denies entry into Israel to every passenger who is <u>not</u> an Israeli citizen or resident, subject to exceptions relating to home Isolation, as published by NOTAM. Relevant NOTAMs (search using "COVID-19/SARS-COV-2") can be found at: http://brin.iaa.gov.il/aeroinfo/AeroInfo.aspx?msgType=Notam	

Italy 14-03-2020	On 12 March last The Minister of infrastructures and Transport and the Ministry of Health issued Decree nr.112. The Decree (art. 2 paragraph 1) provides that services operation is limited to the following airports: Ancona, Bari, Bologna, Cagliari, Catania, Genova Lamezia Terme, Lampedusa, Milan Malpensa, Naples Capodichino, Palermo, Pantelleria, Pescara, Pisa, Rome FCO, Turin, Venice Tesserà e Rome Ciampino only for State flights, emergency flights and transport of organs. For other airports (art. 2 paragraph 2) ENAC can decide to allow operations in consideration of the following situations: a) maintain the certification requirements b) accessibility of ENAC, ENAV SpA and State administration Personnel c) immediate necessity of full operations at the concerned airport d) cargo and mail flights, State flights, sanitary emergency or other kind of emergency. On 13 March last ENAC issued the following indications in accordance to the decree: The airports mentioned at art. 2 par. 1 have to grant operations without any limitation. Airports not included in art. 2 par 1 have to grant operations provided for at letters a) b) c) d) of the decree , included ferry flights, public services obligation flights, ENAV flights All these measures are in force as from today except that for Milan Linate airport where they will be active as from Monday 16 March. The measures will be in force until 25 March next, and if necessary will be prorogated	
Latvia	--	

04-02-2020	For actions taken by ANSP please refer to separate questionnaire	
Lithuania 02-04-2020	-- For information on national measures taken, please refer to separate questionnaire that can be found on the EACCC OneSky Teams site	
Luxembourg 25-03-2020	2 NOTAMs published : All VFR flights, and all IFR leisure and training flights are prohibited within Luxembourgish airspace except medical, SAR, State, military, maintenance, technical inspection flights and flights to assure the functioning of the State. Entry restrictions at Luxembourg airport apply in accordance with the closure of the "Schengen" borders. Almost all operators have stopped passenger flights to/from Luxembourg airport. Cargo flights are taking place. Measures taken by authorities: The state of crisis has been declared on the national territory: https://gouvernement.lu/en/actualites/toutes_actualites/communiqués/2020/03-mars/19-reglement-mesures.html Strong recommendation to stay at home except for essential trips (work, supply of food and other essential and medical supplies). Non-essential businesses that usually receive customers on their premises are closed. Non-essential construction sites and other crafts are closed. Any unnecessary travel must be cancelled or postponed. Health information published: https://msan.gouvernement.lu/en/dossiers/2020/corona-virus.html Currently more than 1000 confirmed cases.	

Moldova 27-03-2020	All scheduled passenger flights and pre-approved passenger charter to and from the Republic of Moldova are suspended. The charter aircrafts, which carry passengers with the citizenship of the Republic of Moldova to the Republic of Moldova, will be authorized, during the state of emergency, by the Commission for Exceptional Situations of the Republic of Moldova, based on the request of the Civil Aeronautical Authority. Air operators who will operate charter flights to the Republic of Moldova during the state of emergency are prohibited from embarking on persons of a different nationality than the Moldovan one. Exception from this provisions can be granted to the person without citizenship and/or foreign nationals residing in or having its residence permit in the Republic of Moldova; flight personnel and crew of the aircraft, as well as the members of the diplomatic missions and of the consular offices accredited in the Republic of Moldova, international organizations / missions and their family members. Those restrictions are valid for the duration of the state of emergency in Moldova, until May 15, 2020, 23:59 local time, with the possibility of extension or until any further announcement. The texts of relevant Directives could be found here http://www.caa.md/rom/documents/	
Montenegro 20-03-2020	Montenegro has taken precautionary measures to protect people against the spread of COVID-19 in the country. In accordance with the orders of the Ministry of Health, the following measures are taken: - all foreign nationals, except those with permanent or temporary residence, are prohibited to enter Montenegro, - 14 days of mandatory self-isolation or quarantine is introduced for all persons arriving from abroad,	For the time being no additional measures affecting aviation are anticipated. As the member of CAPSCA, Montenegro follows agreed instruction on how to proceed according to the situation on the ground.

	- all international flights with the purpose of public transport of passengers are prohibited to take off/land in Montenegro, - international flights with other purpose (repatriation, medical, humanitarian) can only be conducted through LYPG (Podgorica airport) with the approval of the Government of Montenegro, - safety directive on equipping of aircraft with Universal Precaution Kits and cleaning and disinfection of aircraft coming from specific Covid-19 affected areas is in force.	
Netherlands 11-03-2020	Under the authority of the Ministry of Health, Welfare and Sport and based on international advices a number of measures have been implemented for the Netherlands' aviation sector. At this moment these measures consist of informing passengers at Schiphol Amsterdam Airport and on flights between active transmission countries and the Netherlands as well as the registration of passenger information Preparatory measures taken Individuals with severe lung complaints will be referred to their local doctor Public health services are constantly monitoring the situation Further information can be found at: https://www.rivm.nl/en/novel-coronavirus-in-china	
Norway 16-03-2020	Update from Norway: Norway is now closing the border for all travelers from all other countries outside Norway. You have to be a Norwegian citizen to be allowed to enter Norway. Some regions inside Norway have also put in place restrictions for travelling from other regions in Norway.	

	• There is a travel advice that recommend Norwegian citizens to not travel to any other country outside Norway • Norwegian government is also advising people to not travel within Norway unless it is strictly necessary. • The airlines are reducing the number of employees drastic and it means that the number of flights will shortly decrease accordingly. • Avinor will stop traffic to 9 smaller short field airports from Wednesday 18. March. • The airspace in Norway is as from 17. March closed for VFR flights. Exemptions can be given by the ANSP	
Poland 25-03-2020	20 March, 2020, PANSA has updated NOTAM according to format proposed by EACCC/Eurocontrol (NOTAM enclosed). The Council of Ministers of Republic of Poland issued a regulation for the protection of public health and the limitation of the COVID-19 spread which introduces bans in air traffic. From March 15, 2020, civil aircraft performing international flights with passengers landing on registered civil airports and on registered airstrips within the Republic of Poland are banned. Following flight operations are exempted from above: 1) cargo flights, flights without cargo and without passengers; 2) flights with status: HOSP, HUM and other flights performed in order to save people's lives or health (e.g. rescue patrol), flights to protect public order (e.g. with the guard parole); 3) flights to Republic of Poland by aircraft chartered at the order of tour operators or an entity acting on their behalf before march 15, 2020 or at the order of the Prime Minister; 4) charter flights performed by foreign air carriers at the order of foreign States in order to bring back their citizens; 5) emergency flights From March 16, 2020, commercial flights with passengers within the Republic of Poland are	Ministry of Infrastructure together with Polish CAA are preparing a set of regulations to support the polish economy (including civil aviation industry) for the time of crisis. Based on the Act of Aviation Law, in order to guarantee the safety of the Republic of Poland, the Governement of the Republic of Poland has decided to extend the ban on landing at Polish airports. This action is also with relation to art. 21(1) of the Regulation (EC) No 1008/2008 of the European Parliament and of the Council of 24th of September 2008 on common rules for the operation of air

	banned except for flights carried out by public or state interest. Ban is valid until April 11, 2020. Ministry of Infrastructure (ministry of transport) and President of Polish CAA are conducting ongoing crisis management meetings on current pandemic crisis situation. March 23, 2020, PANSa reported 88% decrease of air traffic. Ministry of Infrastructure together with Polish CAA are conducting ongoing videoconferences regarding the current crisis situation in civil aviation and discussing possible measures of protecting aviation entities from critical financial situation and on how to support the civil aviation industry in the time of pandemic crisis. Airports are closed or limited operations.	services in the Community. For this reason, and in order to limit the further spread of the COVID-19 and to minimise the risk to public health, it has been decided to prohibit international flights carrying passengers to land at the civil airports and airfields, registered by the Republic of Poland. This prohibition is with the following exception: a) flights of persons referred to in § 3 paragraph 2 of the Regulation of the Minister of the Interior and Administration, of 13th of March, 2020 regarding temporary suspension or limitation of border traffic at certain border crossings (Journal of Laws item 435), returning to the territory of the Republic of Poland by chartered aircraft; b) flights referred to in Article 76 (1) of the Act of 3th of July 2002 - Aviation Law (medical – HOSP, search and rescue - SAR, humanitarian - HUM, state missions - STATE, public order - GARDA, official mission - HEAD); c) charter flights operated by foreign air carriers, which will be carried out at the request of foreign
--	--	--

		countries, in order to return their citizens. Additionally this regulation prohibits commercial landings at the civil airports and airfields, registered by the Republic of Poland, for flights operating in domestic traffic, with the exception of commercial landings for the purpose of collecting or leaving cargo or mail. The Regulation of the Council of Ministers on bans on air traffic of 24th of March 2020 (Journal of Laws 521) will enter into force on 29th of March 2020 and shall cease to apply on 11th of April 2020.
Portugal 07-04-2020	The current situation in Portugal is an emergency state declared by the Portuguese Government. The Emergency State was renewed until April 17th . All borders are closed and controlled by the Authorities. The current situation is now critical and we are now in the mitigation phase (social distance measures; the majority of the services are closed; prophylactic quarantine measures in Azores and Madeira Islands for all passengers, etc.). We are waiting now for the peak of the pandemic situation – it will occur next month (source: Minister of Health) . The number of flights in Portugal is residual. In the last week , we just had humanitarian or cargo flights, flights for the repatriation of foreigners and national citizens.	

	As a result of the situation, the Portuguese Government decided (Article 6, nr. 5, Portuguese Decree-Law nr. 2-B/2020 and Dispatch Law nr. 4270/2020, April 7th) to close all national airports between 9th and 14th April. A NOTAM will be issued. During this period, only the following flights are allowed: emergency landings, military flights, humanitarian flights (includes cargo for this purpose), flights for the repatriation of Portuguese citizens. During this period, the Government will re-evaluate the situation.	
Romania 25-03-2020	In order to keep you informed about situational status, please find below an update on the COVID-19 preventive measures adopted by the competent State Authorities from Romania, as follows: 1. Based on the decision of the State Authorities, as of 15th of March 2020, 19:00 UTC, aircraft operators shall inform all on-board passengers travelling to Romania that all asymptomatic people coming from countries with over 500 confirmed covid-19 cases will be put into 14 days of self-isolation at a residence declared by their own responsibility upon arrival at the airport; 2. NOTAM A0674/20 has been issued on this respect, based on information needs; 3. Considering the evolution of the international epidemiological situation caused by the spread of SARS-CoV-2 coronavirus in more than 150 countries, as well as the declaration of the "Pandemic" by the WHO on 11.03.2020, noting the evolution of the epidemiological situation in the territory of Romania and the assessment of the public health risk for the next period, which indicates a massive increase in the number of people infected with SARS-CoV-2 coronavirus as of 16th of March 2020 the President of Romania has declared State of Emergency;	

	4. Depending on measures to be taken, aircraft operators and passengers could be affected. Having regard to the latest decisions of state authorities, flight restrictions in FIR Bucharest will be applicable as of today, 25.03.2020, 21.00UTC, in respect to flights from/to France and Germany (NOTAM 0808/20). Also all persons entering the territory of Romania will be isolated into quarantine or put in self-isolation, as the case may be (NOTAM 0809/20). All aircraft operators are requested to consult the list of applicable NOTAM and inform passengers accordingly. Aircraft operators are also requested to consult NOTAM A0799/20 and A0800/20. Any new developments will be notified in due time. For actions taken by ANSP please refer to separate questionnaire	
Serbia 25-03-2020	Ministry of Health established site http://covid19.rs (in Serbian and English) with actual information about status of COVID19 in Serbia. All up to date information on Coronavirus disease COVID-19 could be found on the government portal: https://www.gov.si/en/topics/coronavirus-disease-covid-19/ National Institute of Public Health is also publishing up-to-date information regarding the Corona Virus 2019 - nCoV with recommendations for travellers: https://www.nijz.si/sl/pojav-novega-koronavirusa-2019-ncov Repatriated passengers from critical areas are quarantined for 14 days.	
Spain 12-02-2020	-- For actions taken by ANSP please refer to separate questionnaire that can be found on the EACCC OneSky Teams site	Depending on developments
Sweden 02-04-2020	SE follows all directives and guidelines from EASA and EU and all is published and/or distributed to the providers. Our coordination group is still running as earlier described and we are in close contact with relevant agencies/ authorities. All relevant information can be found at the following link: https://www.transportstyrelsen.se/sv/Om-transportstyrelsen/vart-uppdrag-och-arbetssatt/covid-19-coronavirus/	
Switzerland 08-04-2020	The Federal Council has categorized the situation in Switzerland as extraordinary under the terms of the Epidemics Act.	

	People from all foreign nations will be refused entry into Switzerland (exceptions possible). Authorized flights may enter Switzerland solely at the national airports via Zurich, Geneva and Basel airport (exceptions: cargo, maintenance, aerial work, ambulance flights). Switzerland has completed 21 repatriation flights in cooperation with airlines and will gradually reduce the frequency of repatriation flights. Airlines: SWISS reduced their flights to 10%, Edelweiss is suspending the majority of their flights, Helvetic and EasyJet grounded completely. Detailed information can be found at the website of the FOPH: https://www.bag.admin.ch/bag/en/home/krankheiten/ausbrueche-epidemien-pandemien/aktuelle-ausbrueche-epidemien/novel-cov.html	
Turkey 18-03-2020	Update of the situation in Turkey: General situation – to date March, 17th • 98 confirmed case by the Ministry of Health, 1 Death. • All arriving passengers are being screened and examined at the airports by Ministry of Health. • Passenger flights between Turkey and 21 states (many states from Europe, Middle East in addition to China and South Korea) have been cancelled or interrupted • Currently, there are no passenger flights from these states to Turkey and the aircrafts belong to those states are only allowed to take their own citizens • Turkish carriers are not allowed to take Turkish citizens to those states and the return flights are required to be without any passengers. They are only allowed to carry foreign passengers to those states. • Evacuation operations are being implemented in collaboration with domestic	

	carriers and Turkish diplomatic missions for Turkish citizens in the restricted states for their return to Turkey. All evacuated passengers are kept under quarantine for 14 days upon their arrival to Turkey. • In line with the recommendations of the Ministry of Health, in-flight announcements regarding precautions and filling in passenger health information cards are being made. Additionally protective measures for flight crew, passport polices and security staff working at the airports were introduced. • There is no restrictions in terms of cargo flights.	
Ukraine 25-03-2020	As from 15-03-2020 Ukraine is closing the sovereign territory for foreign people for 2 weeks. Based on government decision all international airports are closed for passenger transportations except UKBB (Boryspil) and UKLL (Lviv) as alternate in case if UKBB is unserviceable. For actions taken by ANSP please refer to separate questionnaire	
United Kingdom 14-02-2020	--	

Impact on air travel

The impact on air travel is increasing significantly. In addition to a strong reduction of passenger demand, countries are increasingly imposing travel limitations.

EACCC

The second EACCC teleconference was held. The EACCC members and SFPs were updated on the current status.

Network Manager

The traffic volume seems to have hit the bottom and stabilises at -86% to -88%. In the coming week no significant changes are expected.

Airlines are reducing their flight schedules significantly especially, but not only to and from the Corona affected areas.

The AOCCC is collecting information about the flight reductions of airlines. This information is available at the following link:

<https://ost.eurocontrol.int/sites/NMCR1/Incident/COVID-19/AOCCC%20information>

NM

The traffic volume has decreased significantly as you can see in Figure 1.

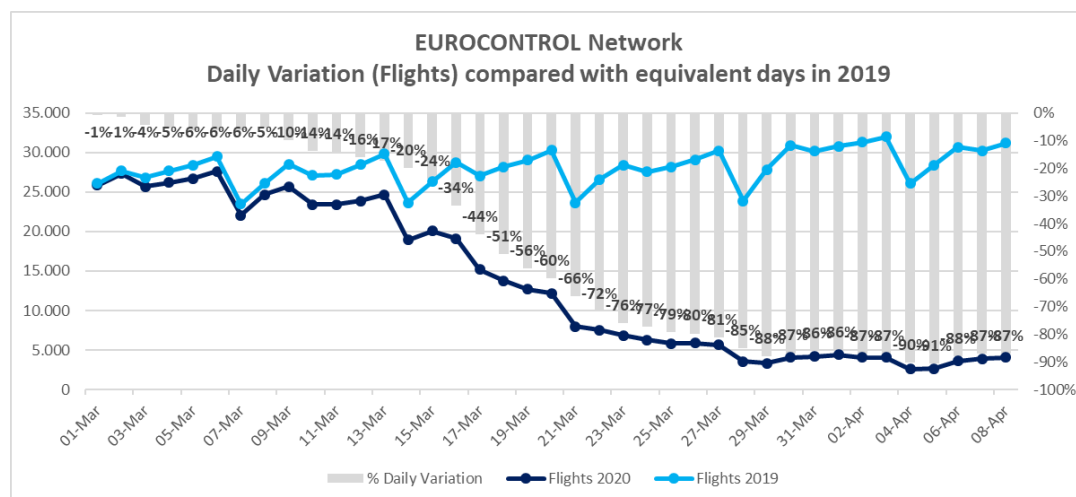

Figure 1: Traffic evolution in the European Network

A daily updated version of the traffic information per ACC can be found on the EACCC OneSky Teams site:

<https://ost.eurocontrol.int/sites/NMCR1/Incident/COVID-19/Daily%20Traffic%20Evolution>

Possible scenarios

Scenario	Network impact
Airlines suspend flight to and from affected region	Limited impact
Airports apply entry/exit screening on flights from affected region	No impact reported
Airports apply entry/exit screening on all flights	N/A
State authorities require quarantine of suspected persons	No impact reported
Passenger locator tracking is activated	No impact reported

Actions in the EACCC framework

It was decided that NM will continue to collect and distribute relevant information by factsheet and e-mail.

During the EACCC teleconference #6 it was announced that the Network Manager has started to develop a Network Operations Planning Recovery Plan. The input from the State Focal Points is an essential contribution to this plan. It was, therefore, agreed that the EACCC will send a questionnaire to the SFPs.

The SFPs are kindly requested to complete this questionnaire and keep it up to date in weekly updates with the developments in their respective states.

The deadline for the weekly update is every Wednesday 15:00 UTC. In case of significant changes, the SFPs are requested to inform the EACCC secretariat immediately
